

We're Bringing Simplicity To Telecom

ON-Net Peering ~ ON-Net Tandem
OFF-Net Domestic ~ International ~

We're Bringing Simplicity To Telecom

INTRODUCING...

▶ ON-Net Peering | Member To Member Termination

\$0.004 per MOU anywhere in North America to another Member

\$0.002 per MOU **PAID** to you the Member for calls terminated on your network

Member to Member calls are quick and easy to setup.

We simply upload your registered NPA-NXX blocks of numbers into our system.

Typically we will gather this information from the LERG or from you directly.

Any leased Phone Numbers or Numbers that have been LNP'd into Your network we will identify through our automated systems.

We're Bringing Simplicity To Telecom

INTRODUCING...

- ▶ ON-Net Tandem | Member terminating traffic to a different switch location within their company footprint.

\$0.002 per MOU paid by Member to terminate traffic to a different location

Member Tandem Services can be a great cost savings.

Allow us to be your Tandem instead of paying for costly long haul fiber or wireless collocation facilities.

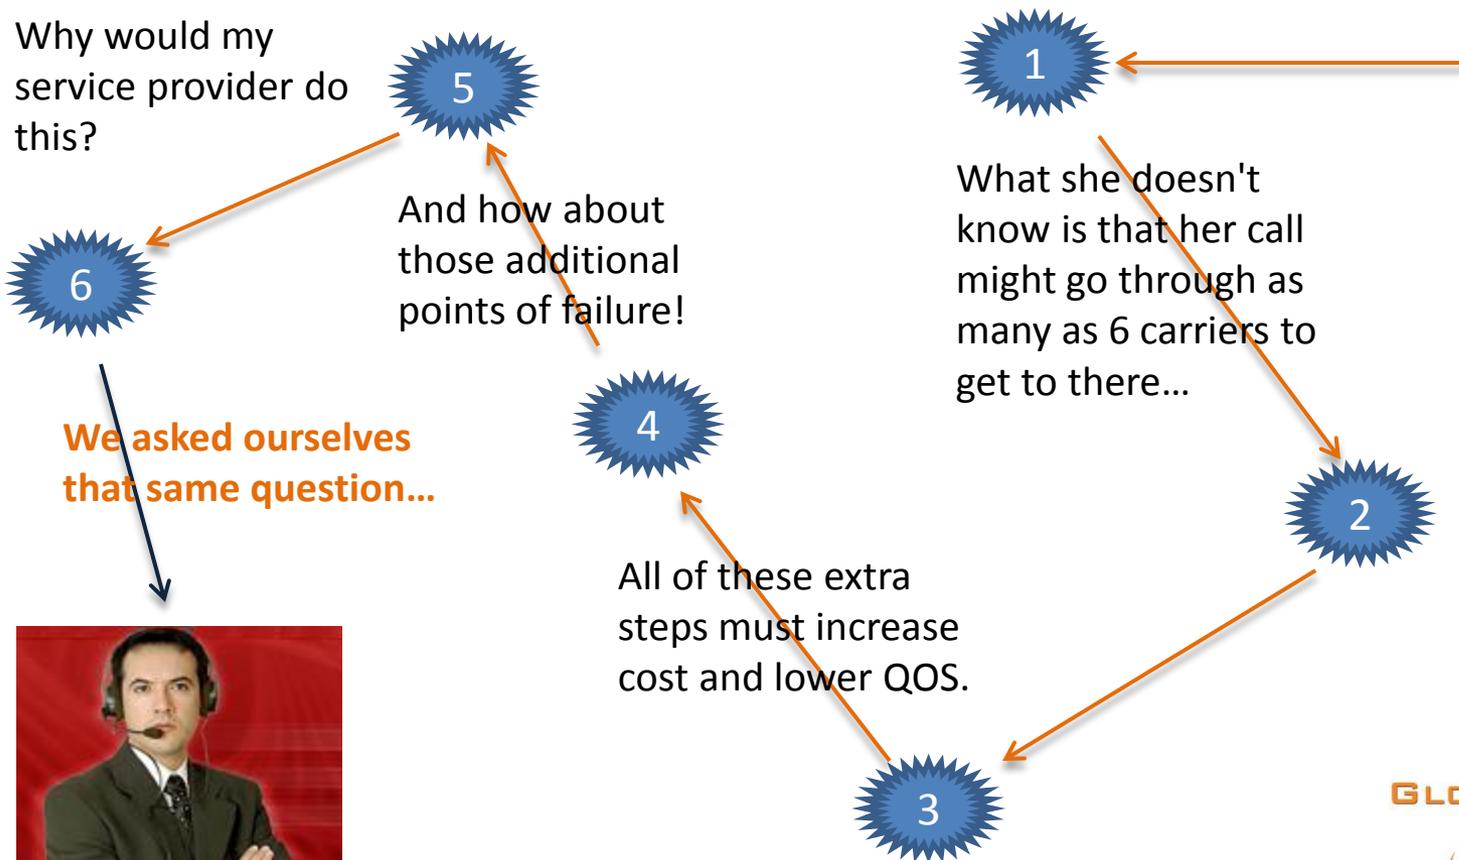

Simplicity and ease of use are what we create for you the Member

We're Bringing Simplicity To Telecom

Do you know where your call is going?

Why would my service provider do this?

Marisa in New York wants to call her friend in LA.

We asked ourselves that same question...

We're Bringing Simplicity To Telecom

Our Approach Is Much Simpler...

Marisa in New York
wants to call her
friend in LA.

That's the way it
should be, one stop
for clearer voice
quality and reliable
service...

**Member to Member traffic traversing a single
connection point at a cost effective rate...**

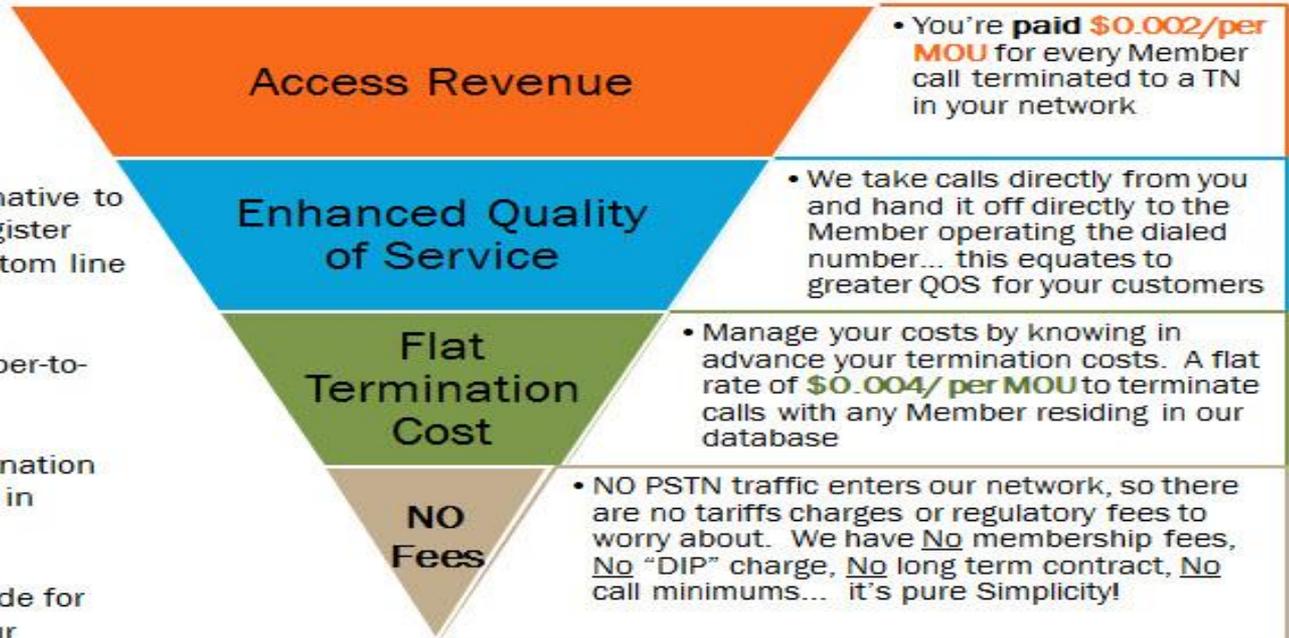

**Join today and begin experiencing what all of the
hype is about...**

We're Bringing Simplicity To Telecom

Global IP Tandem is your new alternative to the PSTN for all your VoIP calls. Register today to begin enjoying a better bottom line with our products...

- "On-net Peering" flat rate Member-to-Member termination
- "On-net Tandem" flat rate termination for Member switches operating in different locations
- "Off net" terminations nationwide for TN's not currently residing in our database

We're Bringing Simplicity To Telecom

Global IP Tandem is your one-stop source for exchanging digital phone traffic directly with other Global IP Tandem Members. Our Patent Pending Self Learning Routing Engine or SLRE switch technology delivers high quality point-to-point connections between our Member networks.

Our ON-NET service offering operates completely independent of the PSTN, eliminating the complicated structure of tariffs and expensive costly collocation and integration.

- **No Long Term Contracts**
- **No Call Minimums**
- **No 'DIP' Charges**
- **No Membership Fees**
- **No Risk**

By joining the Global IP Tandem network of Member companies, we eliminate several points of failure by minimizing the use of multiple carrier connections to deliver your traffic. By delivering ON-NET calls directly from the origination point to the termination point, we are able to improve Quality of Service and offer a standard flat rate of \$0.004 per MOU anywhere in North America.

Integration with Global IP Tandem is simple. We assign you an IP address and connect you via a secured IP Tunnel and you are ready to enjoy the benefits of becoming a participating member company.

If all this sounds too good to be true..... It's not! Global IP Tandem only has one simple rule:

WE ABSOLUTELY WILL NOT CARRY OR TERMINATE ANY CALLS THAT HAVE TRAVERSED THE PSTN. ANY MEMBER COMPANY THAT FAILS TO COMPLY WITH THIS RULE WILL BE BANNED FROM MEMBERSHIP INDEFINITELY AND HELD LIABLE FOR ANY RESULTING IMPOSED FEDERAL OR STATE FEES OR FINES.

ARE YOU READY TO GET STARTED...

5 simple steps

1

Register Today!

Registration On The Web site Is Fast and Easy...

If you prefer you can call our Inside Sales support line to get you started right away.

2

Complete The Enrollment Process

Contracts, Contracts, Contracts, nobody likes to do them but its just a part of the business.

So lets get them completed so we can move into the testing phase.

3

Integration and Testing

Testing is pretty straight forward, we share our information and you share yours...

All we require is a separate trunk group for your On-Net traffic from your Off-Net traffic.

4

Start Exchanging Traffic

Production traffic can begin after we verify the call counts and costs with your records.

5

Account Management and Billing

Use our new, soon to be released Member Portal for all of your call pattern statistics.

We're Bringing Simplicity To Telecom

Everyone here at Global IP Tandem is glad you have taken the time to stop by our Suite today and we look forward to working with you very soon.
